DIS 2 – Assignment 6

Ridho Laksono (Ridho.laksono@rwth-aachen.de)
Muhammad Rohan Ali Asmat (m.rohan.a.asmat@gmail.com)
Zeeshan Haider Malik (zeeshan812@gmail.com)

To Run The Program:

Open the project in Xcode and run it.

Tasks Completed:

- All the compulsory tasks completed:
    - When the user selects the language in the main window the text field changes it correspondingly.
    - Table View in editor window can be edited and changes correspondingly.
    - Constraints applied on UI using auto layout.

Extra Credit:

- Cocoa bindings are used to do the linking between model and view.
- If you edit table and go to file and select, "**Save"** it will save the current state.
- If you go to window there are two options added one to open editor window if closed and other to open main window if closed.
- Core data is used in order to store the languages and their description.
